## DETAILED ACTION

### *Continued Prosecution Application*

The request filed on September 17, 2001 for a Continued Prosecution Application (CPA) under 37 CFR 1.53(d) based on parent Application No. 09/541,180 is acceptable and a CPA has been established. An action on the CPA follows.

No preliminary amendments were filed with the request for CPA. Claims 77 - 84 are pending.

### *Priority*

This application is a Continuation of application serial No. 08/007742, filed 1/22/1993.

### *Double Patenting*

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 3713

Claims 77-84 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 13-19 and 21 of U.S. Patent No. 6048269. Although the conflicting claims are not identical, they are not patentably distinct from each other because the only difference between the patented claims and the instant claims lie in the recitation of a system having a plurality of game machines, each having the same features as the prior patented game machine. The mere provision of a plurality of apparatus all having the same features would have been obvious to one of ordinary skill in the art at the time of the invention, so that more than one player could use the game apparatus features at the same time. As the current claims present an obvious variation of the prior claims, the grant of a second patent would result in an improper extension of exclusivity.

Upon the filing of a proper terminal disclaimer, claims 77 - 84 would be allowed.
